## Danville Area Soccer Association

---

### Thunderstorm / Lightning Procedure and safe practices

In the event of thundershowers and lightning, please follow the following instructions:

With the open nature of the complex, and no suitable structure for protection, the only safe place during a thunderstorm is in your car.

Please retreat immediately to your car with your family if there is a threat of lightning and thundershowers.

Everyone must take personal responsibility for their safety. Adults, coaches, referees, and everyone else must keep an eye to the sky and react immediately to a sighting of lightning by abandoning their game and proceeding immediately to their cars. Do not allow children (or adults) to continue to play or to be outside while storms are in the area.

Games will resume 30 minutes after the last sighting of lightning, at the point where the game was suspended.

Thank you in advance for your cooperation
